County's share of the project shall be that amount of the aforementioned construction cost expended on the portion of the project which lies within unincorporated territory of County. In the event the aforementioned final accounting shows that the sum advanced to City is less than County's share of the total construction cost, County shall pay City the difference within sixty (60) days from receipt of the final accounting. However, in the event this final accounting shows that the sum advanced to City is more than County's share of the total construction cost, City shall return the difference to County within sixty (60) days.

3. City's Share of Cost

City's share of the project shall be that amount of the aforementioned construction cost expended on the portion of the project which lies within incorporated territory of City. City shall contribute toward the cost of construction of the project all of the urban extension matching funds received from the State of California for that portion of the project which lies within incorporated territory of City, plus a sum of money equal in amount to the aforementioned urban extension matching funds, plus any additional sum necessary to make up City's share of the project.

4. Parties to Provide Necessary Rights of Way
